<students/>

```
<?xml version="1.0" encoding="UTF-8"?>
<!-- This is an XML document that describes students -->
<students>
       <student id="0001">
               <name>Jim Bob</name>
               <status>graduate</status>
               <dorm/>
               <major>Computer Science &amp; Music
               <description>
                       <![CDATA[ <h1>Jim Bob!</h1>
                       Hi my name is jim. I look like
                       <img src="jim.jpg"> ]]>
               </description>
       </student>
       <student id="0002">
       </student>
</students>
```

XML Declaration

- Optional
- Must appear at the very top of an XML document
- Used to indicate the version of the specification to which the document conforms (and whether the document is "standalone")
- Used to indicate the character encoding of the document
 - □ UTF-8
 - □ UTF-16
 - □ iso-8859-1
 - □ ...

Elements

- Main structure in an XML document
- Only one root element allowed
- Start Tag
 - □ Allows specification of zero or more attributes <student id="0001" ...>
- End Tag
 - Must match name, case, and nesting level of start tag </student>
- Name must start with letter or underscore and can contain only letters, numbers, hyphens, periods, and underscores

Content Models

Element Content

Parsed Character Data (aka PCDATA, aka Text)

```
<name>Jim Bob</name>
```

Mixed Content

```
<name>Jim <initial>J</initial> Bob</name>
```

No Content

```
<dorm/>
```

<student id="0001">

Attributes

- Name
 - Must start with letter or underscore and can contain only letters, numbers, hyphens, periods, and underscores
- Value
 - □ Can be of several types, but is almost always a string
 - Must be quoted
 - title="Lecture 2"
 - match='item="baseball bat"'
 - □ Cannot contain < or & (by itself)

Jim Bob

PCDATA

- Text that appears as the content of an element
- Can reference entities
- Cannot contain < or & (by itself)

&

Entities

- Used to "escape" content or include content that is hard to enter or repeated frequently
 - Somewhat like macros
- Five pre-defined entities

```
□ & < &gt; &apos; &quot;
```

Character entities can refer to a single character by unicode number

```
□ e.g., © is ©
```

- Must be declared to be legal
 - □ <!ENTITY nbsp " ">
- Cannot refer to themselves

<![CDATA[<h1>Jim Bob!</h1> ...]]>

CDATA

- Parsed in "one chunk" by the XML parser
- Data within is not checked for subelements, entities, etc.
- Allows you to include badly formed markup or character data that would cause a problem during parsing
- Example
 - □ Including HTML tags in an XML document

<!-- This is ... -->

Comments

- Can include any text inside a comment to make it easier for human readers to understand your document
- Generally not available to applications reading the document
- Always begin with <!-- and end with -->
- Cannot contain --

SimpleXML

http://us2.php.net/simplexml

DOM

```
Document
<!-- smaller, simpler document -->
<students>
  <student id="1">
                                                        Comment
                                                                    Element: students
      <name>Jim Bob</name>
      <status>graduate</status>
  </student>
</students>
                                                        Text: \n\t
                                                                    Element: student
                                                                                    Attr: id
                                                                                                Text: \n
                                                                                                    Text: \n\t
                                         Text: \n\t\t
                                                      Element: name
                                                                      Text: \n\t\t
                                                                                   Element: status
                                                       Text: Jim Bob
                                                                                   Text: graduate
